**Under The Skin** is the rock band from Frýdek-Místek formed in 2012.

Their style is crossover rock influenced by blues, southern rock and trash metal with raw live energy. Not being stuck in single genre is fresh and band uses its colourful music to express themselves to a great extent.

Supported by meaningful deep, raw and emotional lyrics and conceptual approach to music, band easily crosses genres at will and enjoys unpredictability.

With their latest release, third LP named **Resistance** (2025), they aim for wider audience and recognition.

### Discography

#### **Resistance (2025)**

On fourteen tracks, the band tells a story about a young orphaned boy and his way to vengeance, resistance and endurance.

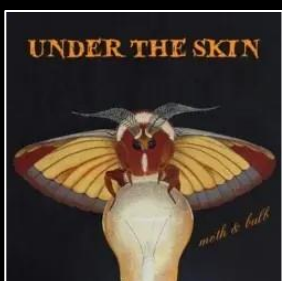

Mature rock album, where each song catches and does not let the listener go.

#### **Planet Earth's Survivors (2017)**

Epic storytelling about environment pollution and its impact on the human.

Twelve tracks are overflowing with raw metal energy and which blend different genres together beyond comparison.

#### **Moth & Bulb (2015)**

Band's first journey to the professional world of music.

Likeable debut sets a band's tone on eleven tracks.
